

# NOXY® PROPACK VCI

## MOBILE DIFFUSER

Protection grows  
with movement!

**Noxy® Propack VCI** was conceived to protect metal items during long hauls inside freight containers, boxes or crates.

The **Noxy®** diffuser is applied inside the container and activated a few hours prior to departure. Immediately on being activated it will start emitting the protective vapours and, thanks to its patented spring system, it will disseminate its **Propack VCI** content at every movement of the transport vehicle. This makes it particularly suitable for supplementing or reinforcing the anticorrosive action in very large packs over long distances, even in critical climatic conditions. The result with **Noxy®** is unbeatable protection, both intense and long lasting. It may also be hung or fastened to the part being protected thanks to its suspension system.

**Noxy®** can be repeatedly deactivated and reactivated: thus it is not only effective, but also economical.

**Noxy®** the oscillating diffuser... **A successful Propack VCI idea!**

PROPACK®  
Anticorrosion

# NOXY<sup>®</sup> PROPACK VCI MOBILE DIFFUSER

Product	Weight (g)
NOXY shell	20
Mini VCI tablets	15 ± 3%
NOXY with mini VCI tablets	35 ± 3%

Product	Height (mm)	Diameter (mm)	Pieces per pack
NOXY in stand-by phase	65	6	200
NOXY in active phase	95	6	200

NOXY<sup>®</sup> Stand-by phase

NOXY<sup>®</sup> Active phase
